ABOUT US

KUDO is a private label brand of the Russian Technical Aerosols group of companies.

The Russian **KUDO** brand was launched in 2005, when production of aerosol paints began under this name. **KUDO** polyurethane foam followed in 2012, and construction sealants were introduced under the same brand in 2017.

Today, the **KUDO** range includes aerosol paints and coatings for automotive and general construction applications, liquid rubber, corrosion protection products, designer paints, household aerosols, professional and DIY polyurethane foams and foam adhesives, thermal insulation, primers, cleaners and construction sealants. **KUDO** products are sold in Russia, Kazakhstan, Belarus, Armenia, Serbia, Moldova, Azerbaijan, Georgia, Kyrgyzstan, Mongolia, Tajikistan and Uzbekistan.

KUDO products are manufactured at the Elf Filling JSC and RusTA LLC plants in Elektrougli, near Moscow. Elf Filling JSC is a leader in the production of technical aerosols.

The plants occupy a total area of 40 000 m^2 and use high-performance equipment that meets Russian and European production safety requirements. They have their own gas storage facilities. Annual output exceeds 45 000 000 aerosol cans and 5 000 000 bottles of liquid products.

The companies operate a quality management system certified to ISO 9001:2015. Their modern Research and Development Centre has developed and brought into production more than 450 aerosol products, 120 technical fluids, 150 paints and coatings, and 50 polyurethane foams over 20 years. Its specialists have developed and introduced the proprietary technologies **3P** (Professional Precision Painting), **FCS** (Fireproof Control System), **AFC** (Advanced Freeze Control), **MMA** (Multi Material Adhesion) and **VSC** (Vario Smart Cell), which significantly improve product quality and performance.

In-house research and engineering expertise, manufacturing in Russia and direct contracts with leading global suppliers of raw materials and components enable **KUDO** to offer products that match the best international standards of quality at highly competitive prices.

The Russian Technical Aerosols group currently employs more than 700 people, and its workforce continues to grow.

KUDO RAL FAST-DRYING ACRYLIC PAINT

GLOSS / MATT

Fast-drying, general-purpose acrylic aerosol paint (enamel) for primed metal, wood, concrete, plastic and other surfaces. Gives excellent results in decorative and finishing work. For interior and exterior use.

Easy to apply in hard-to-reach areas, with good adhesion and hiding power. Forms a durable, weather-resistant coating with high hardness and mechanical strength. Offers bright, rich colours, high flexibility and good adhesion to plastics. High-gloss and matt colours are available. The palette conforms to the European RAL colour standard.

The cans have tamper-resistant caps (see the information at the end of this catalogue).

KUDO RAL ALKYD SPRAY PAINT

High-quality alkyd enamel for painting primed metal and wood surfaces. Easy to apply in hard-to-reach areas. Forms a durable, weather-resistant coating with good hiding power and excellent adhesion to the surface. The spray nozzle allows fast, convenient application. For interior and exterior use. In combination with a primer, it provides good corrosion protection for metal.

The cans have tamper-resistant caps (see the information at the end of this catalogue).

KUDO METALLIC SPRAY PAINT REFLECTIVE FINISH

High-quality, fast-drying enamel for decorative painting of metal, wood, plastic, plaster and ceramic surfaces. Produces a bright, rich metallic sheen and is easy to apply in hard-to-reach areas. For interior and exterior use.

After application, the pigment in this enamel rises to the surface of the binder, producing a high gloss and a pronounced metallic sheen. The pigment at the surface is unprotected, so these enamels are suitable only for areas not subject to mechanical wear. Do not apply a clear coat over KUDO REFLECTIVE FINISH enamel, as this will destroy the decorative effect.

KUDO METALLIC SPRAY PAINT SILVER GRAIN FINISH

High-quality, fast-drying enamel for decorative painting of metal, wood, plastic, plaster and ceramic surfaces. Produces a bright, rich metallic sheen and is easy to apply in hard-to-reach areas. For interior and exterior use.

After application, the pigment in this enamel remains within the binder. Its visual effect is less pronounced than that of KUDO REFLECTIVE FINISH enamel, but its resistance to mechanical wear is much higher. KUDO SILVER GRAIN FINISH enamel can be overcoated with a clear coat.

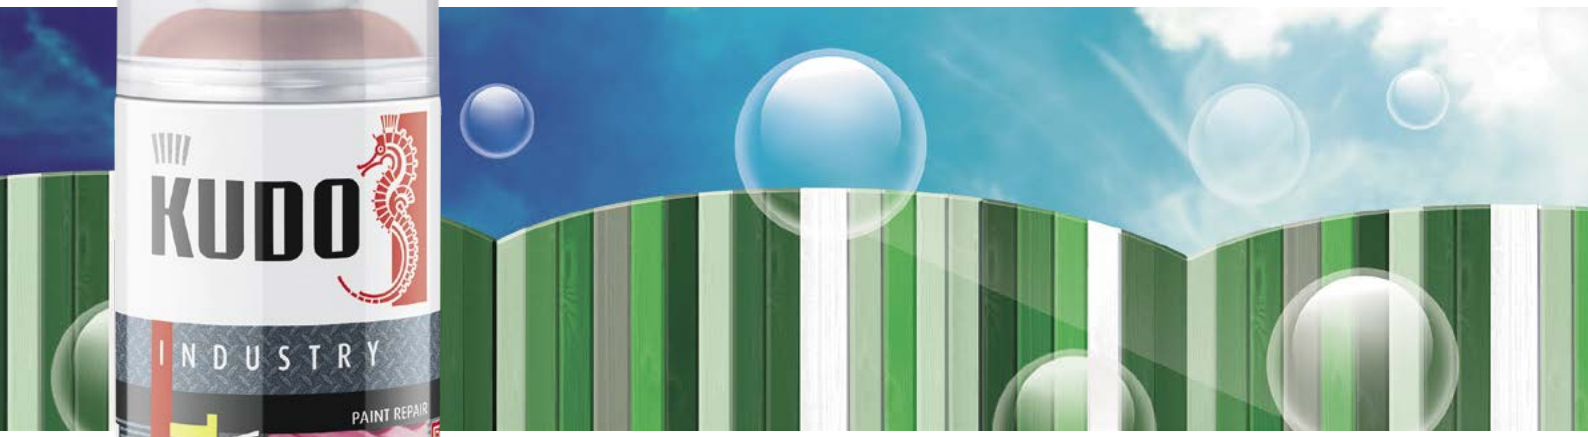
KUDO RAL REPAIR PAINT

FOR METAL ROOF TILES AND PROFILED SHEETING



High-quality, fast-drying enamel for a wide range of metal products, including the repair of paint defects and damage to polymer coatings during installation of metal roof tiles, profiled sheeting, gutters, ventilation systems, retail equipment and similar items. Colours conform to the European RAL standard. For interior and exterior use. Easy to apply in hard-to-reach areas, with good hiding power. The coating provides excellent adhesion, a semi-matt finish and good resistance to impact, bending and other mechanical stresses. It gives painted surfaces reliable protection, high weather resistance and strength, and a long service life.

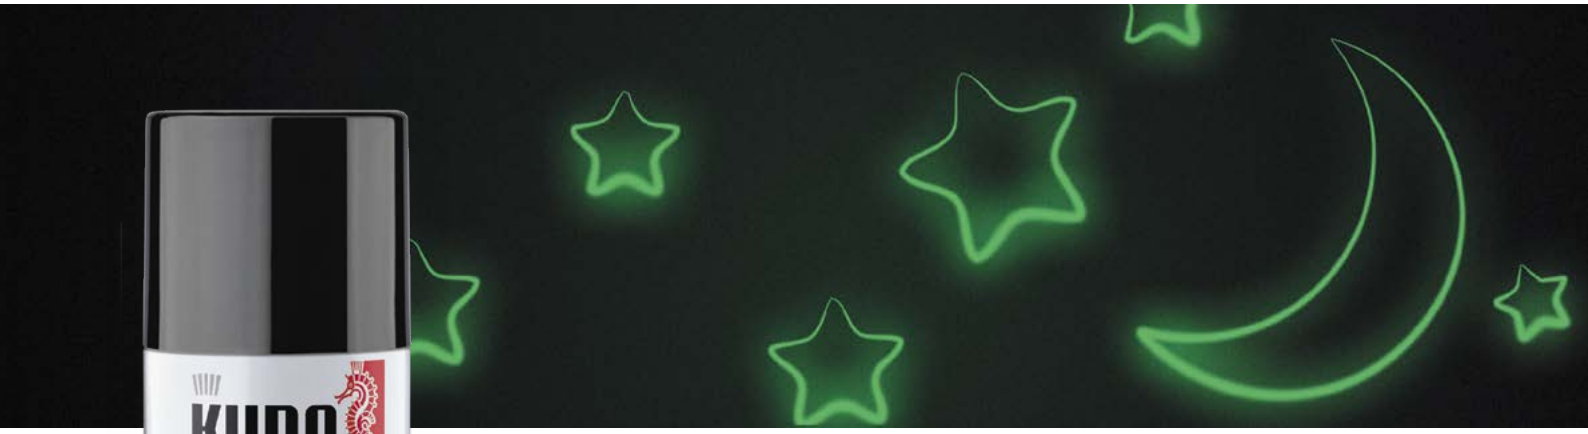
KUDO GLOW-IN-THE-DARK PAINT



Designed for marking information to improve its visibility in the dark, indoors and outdoors:
- in self-contained emergency lighting and signalling systems;
- on illuminated evacuation, warning and direction signs;
- for outdoor advertising and information signs;
- in stage equipment, scenery and original design work;
- for producing additional elements for workwear and safety helmets;
- in underground railways, pedestrian subways, tunnels and mines;
- for vehicle identification markings in car parks and at airports;
- for decorative purposes: clocks, Christmas tree decorations, toys and similar items.

The coating absorbs energy from daylight, ultraviolet light and incandescent lamps, and produces a long afterglow in the dark. Once the glow has faded, it can be recharged by exposure to a light source an unlimited number of times.

APPLICATION:

Warning! Apply the enamel only over a white primer. Otherwise, the glow will be weak.

KUDO HAMMERED-FINISH RUST-STOP SPRAY PAINT

High-quality alkyd enamel containing corrosion inhibitors and silicones, suitable for ferrous alloy items that are already rusty or prone to corrosion, and for decorative painting of primed wood, plastic and other surfaces. Combining a rust neutraliser, primer and decorative enamel in one product (3-in-1), it considerably reduces the time needed to obtain a protective coating. Good hiding power, excellent adhesion and weather resistance provide lasting surface protection and a high-quality decorative finish. Easy to apply in hard-to-reach areas. For interior and exterior use.

KUDO RUST-STOP PRIMER AND PAINT SMOOTH MATT FINISH

High-quality synthetic enamel for ferrous alloy items that are prone to corrosion or already rusty. Combining a rust neutraliser, primer and decorative enamel in one product (3-in-1), it considerably reduces the time needed to obtain a protective coating. This is especially useful for components and structures with complex profiles that are difficult to clean. Good hiding power, excellent adhesion and weather resistance provide lasting surface protection and a high-quality decorative finish. Easy to apply in hard-to-reach areas. For interior and exterior use.

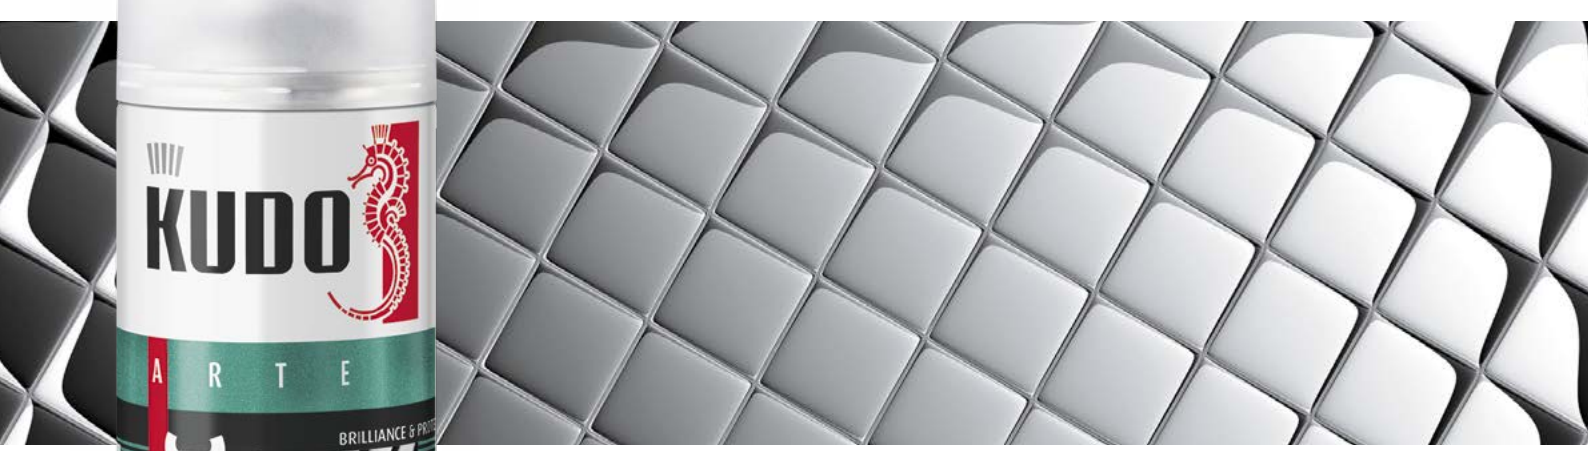
KUDO ALU-ZINC
PROTECTIVE SPRAY PAINT



High-quality synthetic enamel for ferrous alloy items, for use as a primer or a standalone coating. An optimum balance of fine zinc flakes and aluminium pigments combines reliable electrochemical protection of metal with good decorative properties. Dries quickly to form a strong protective layer with excellent adhesion, a metallic aluminium sheen, and high resistance to weathering, wear and corrosion. Suitable for automotive work and repairs to gutters and roofing. For interior and exterior use.

KUDO NON-SLIP COATING CLEAR

High-quality formulation for creating a durable, wear-resistant, non-slip coating on steps, paving slabs, floors, hand tools, truck beds and similar surfaces. Enables comfortable, safe movement on slippery and wet surfaces. Ideal for floors, ramps, stairs, entrance steps, walkways, showers and pool surrounds.

Protects against mechanical damage. Dries quickly to form an even, colourless, water-resistant layer, with excellent adhesion to metal, wood, ceramic and stone tiles, mosaics, granite, marble, concrete, glazed brick, plastic and other smooth surfaces. For interior and exterior use.

APPLICATION:

Warning! This is a permanent coating. It is not intended as a temporary coating for vehicle paintwork.

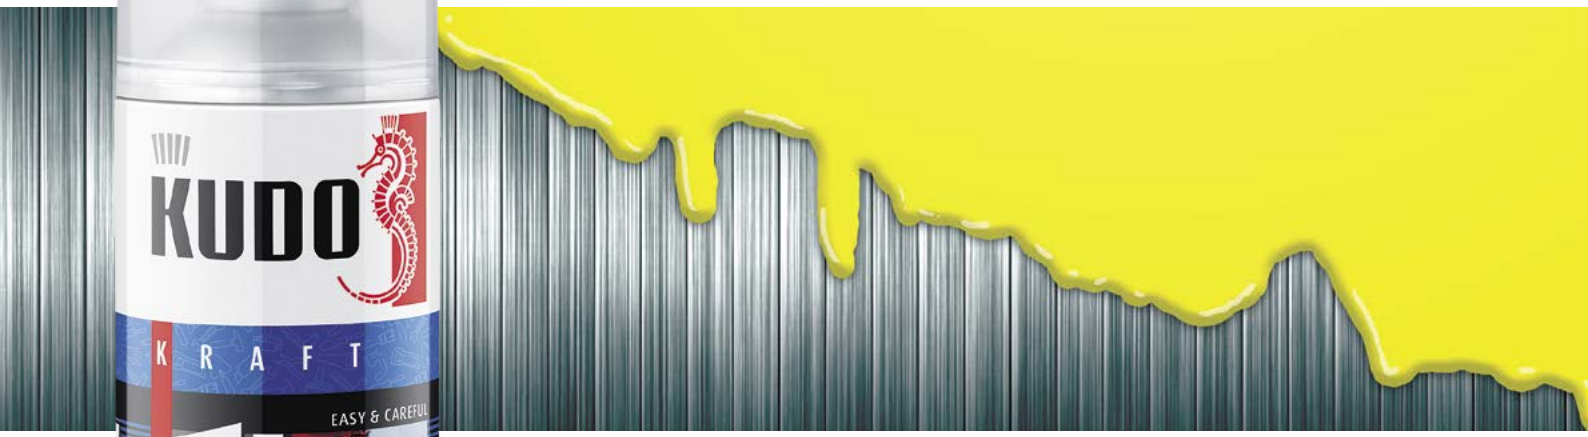
KUDO OLD PAINT REMOVER



An excellent solution for quickly removing old paint coatings, including from hard-to-reach areas on items with complex surface geometry. Unlike conventional mechanical methods, it removes coatings without the risk of damaging the surface. Effective on most paint coatings, including oil-based, alkyd, nitrocellulose, acrylic and melamine-alkyd coatings. Does not remove powder coatings. For exterior use and, with appropriate precautions, interior use.

Surfaces treated with the remover must be degreased before repainting. KUDO Universal Degreaser is recommended for this purpose.

APPLICATION:

Warning! Before applying to painted plastics, test on an inconspicuous area to ensure that the remover will not damage the surface.

KUDO ALKYD
RADIATOR SPRAY PAINT

High-quality alkyd enamel for protective and decorative painting of heating systems, including radiators and water pipes. Dries quickly and provides high hiding power, making it ideal for painting new surfaces and refurbishing old ones. Once dry, it forms a reliable, weather-resistant coating with high hardness and a long service life, withstanding temperatures up to +80 °C throughout the service life of the painted heating system component. The coating retains its gloss, resists impact, bending and other mechanical stresses, and withstands brief exposure to water, ethylene glycol-based heat transfer fluids and household detergents.

KUDO HEAT-RESISTANT PAINT FOR GRILLS AND BARBECUES

High-quality silicone resin enamel for metal items exposed to temperatures up to 650 °C. Its binder, consisting of silicon atoms, organic radicals and oxygen, offers excellent resistance to the damaging effects of high temperatures. Contains no lead or mercury. Easy to apply in hard-to-reach areas. For interior and exterior use. Suitable for barbecues, stoves, grills and fireplaces, and may also be used on water heaters, boilers and radiators. Provides good hiding power and helps extend the life of the painted surface. Does not crack or peel, dries quickly under ambient conditions and allows rapid coverage of large areas.

APPLICATION:

Warning! Do not paint hot surfaces or components. Paint only the outside surfaces of cooking equipment. To obtain resistance to oil, petrol and salt, the coating must be heat-cured: before first use, heat the painted item to 250–300 °C and maintain this temperature for 15–20 minutes.

KUDO WASHABLE SPRAY CHALK

FOR TEMPORARY DECORATION

High-quality, water-based paint that washes off easily. For temporary decoration of windows and shop windows, lettering and graffiti, automotive airbrushing, etc. Ideal for celebrations, advertising campaigns, promotions and sales. May be used for temporary road markings, product identification and other production and warehouse needs. Provides high hiding power and a matt finish. Apply by spraying directly or through a stencil. A safe, non-toxic product with a pleasant scent. Outdoors, it remains on painted surfaces for up to two weeks, depending on the amount and intensity of rainfall. When required, it washes off smooth surfaces easily and without a trace under a strong jet of water. Removal from porous and absorbent surfaces may be difficult.

High-quality, water-based KUDO Artificial Snow decorative coating that washes off easily. A safe, non-toxic product, ideal for indoor use. For decorating Christmas trees, interior accessories, windows, shop windows and mirrors. Easy to use, with high hiding power, it creates a textured "snow" layer that closely resembles a dusting of snow. Apply by spraying directly or through a stencil. Solvent-free, with a pleasant scent.

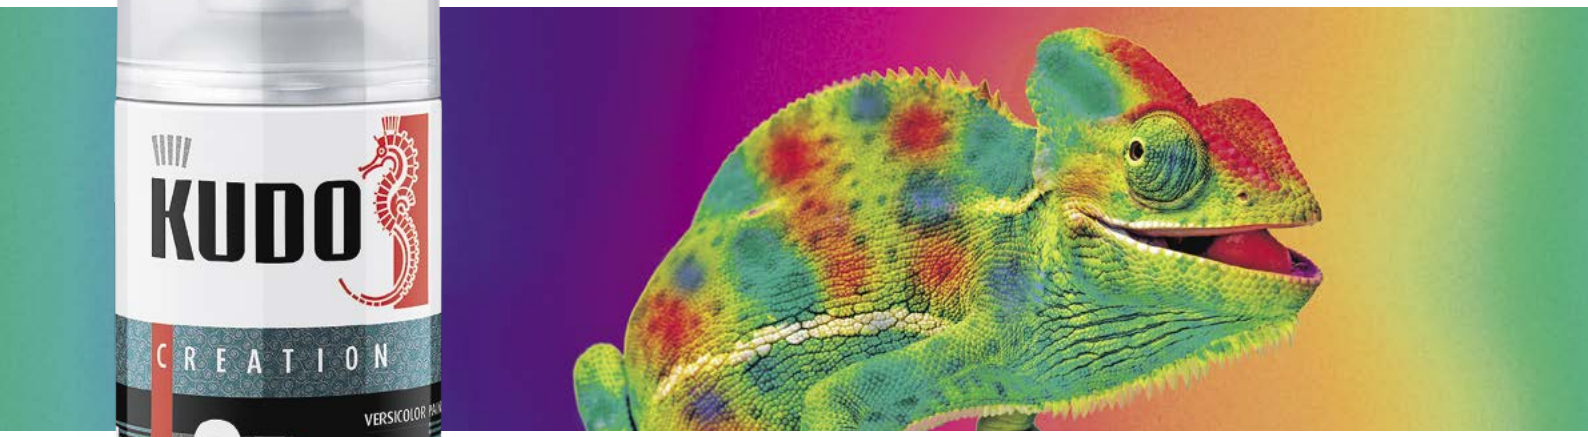
CHAMELEON

KUDO DECORATIVE PAINT



KUDO CHAMELEON paint creates a unique decorative coating with a light-refraction effect. Interference pigments make the coating change colour depending on the angle of light falling on the painted surface. KUDO CHAMELEON looks striking on any item and is most effective on gently curved surfaces. For interior and exterior use, on all types of surface. If required, apply KUDO General-Purpose Acrylic Varnish KU-9002 or KU-9004 to provide an additional protective layer.

KUDO CHAMELEON paint is translucent when dry, so the original colour of the item affects the final coating colour. Pre-painting with a coloured acrylic enamel or primer creates unique colour results. The chameleon effect also depends on the lightness of the base: the darker the base, the stronger the effect.

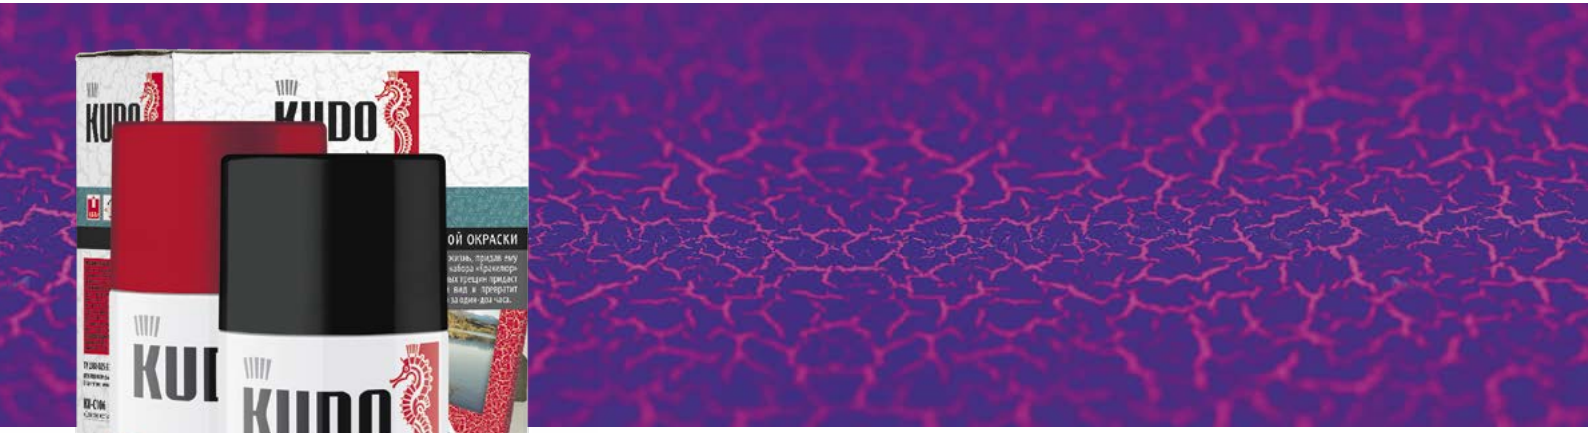
KUDO CRACKLE EFFECT

DECORATIVE PAINT KIT



A two-step crackle effect is created by applying two successive coats: a base coat and a topcoat. Apply the base coat (A) first; this will be visible through the cracks. Once the base coat is dry, apply the topcoat (B). The size of the cracks depends on the thickness of both coats. The base coat is a high-quality enamel for primed metal, wood, plastic, ceramic and other surfaces. It forms a highly durable coating with good hiding power and excellent adhesion. May be applied over existing paint after testing compatibility on an inconspicuous area. The high-quality matt enamel used for the topcoat forms a highly durable coating with good hiding power, weather resistance and excellent adhesion to the substrate. If required, the finished item may be coated with an alkyd gloss varnish.

KU-C10x

kit: 2×520 ml	per carton: 6 kits
carton size:	278×210×210 mm
carton weight:	4.6 kg

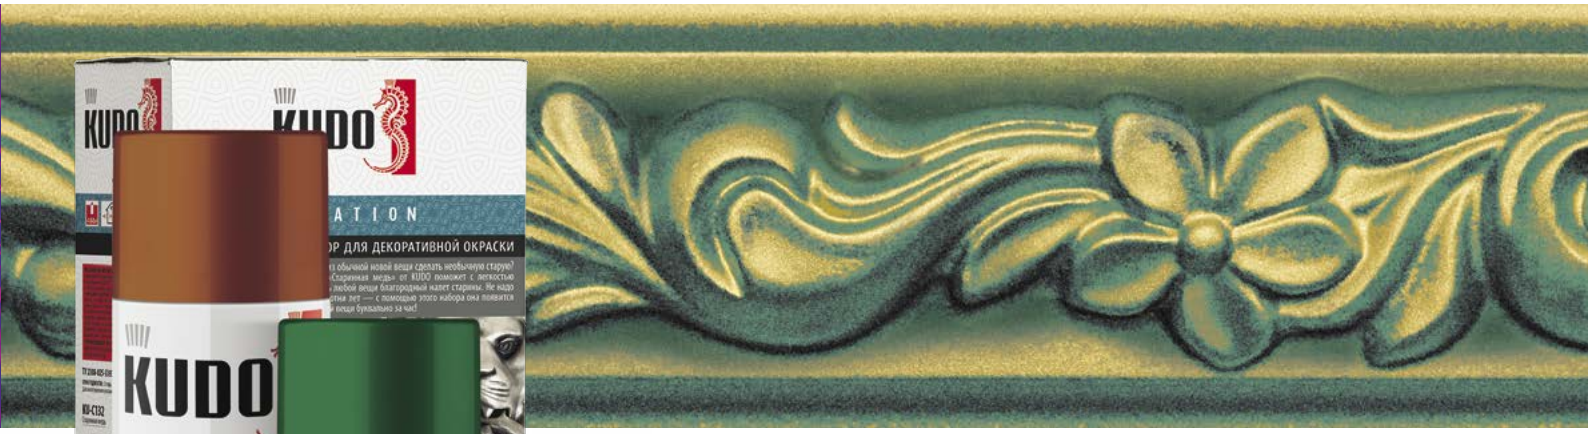
KUDO VINTAGE. ANTIQUE METALS

DECORATIVE PAINT KIT



Decorative paint kit for an aged finish. Base coat (A) is a high-quality metallic acrylic enamel. Apply to primed metal, wood, ceramic and other surfaces. May be applied to foamed polyurethane mouldings previously primed with KUDO Adhesion Promoter (KU-6000). Application to expanded polystyrene or polypropylene is not guaranteed. May be applied over existing paint after testing compatibility on an inconspicuous area. Topcoat (B) is a water-based paint that imitates natural oxides on metal. Apply over the base coat once it is completely dry (after at least 1 hour). For greater resistance to mechanical damage, apply KUDO General-Purpose Matt Acrylic Varnish once the surface is dry.

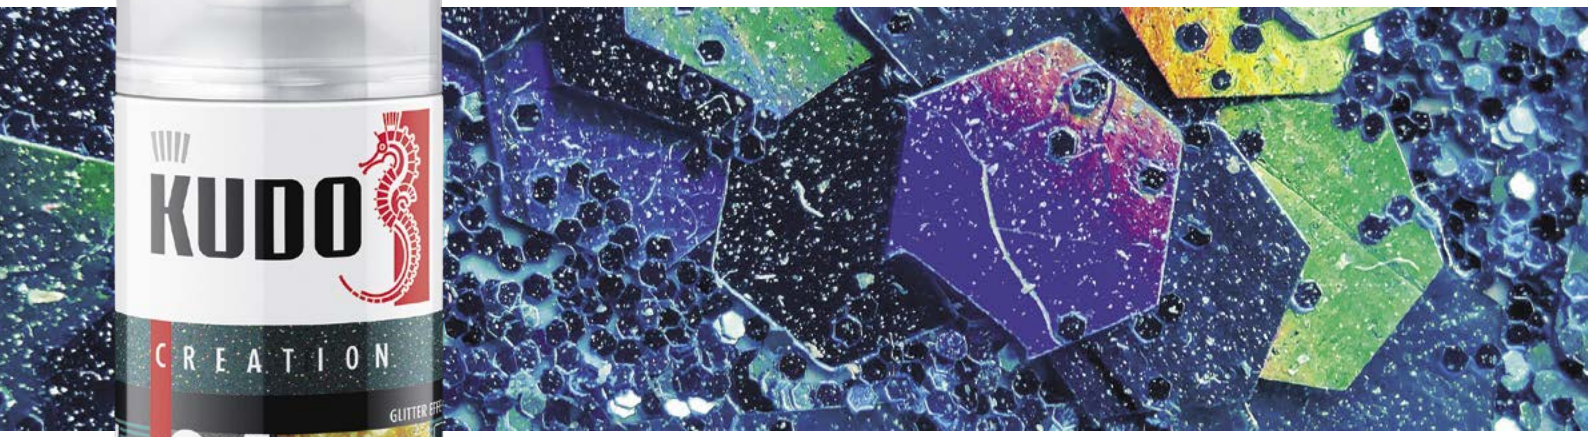
KUDO GLITTER EFFECT

KUDO DECORATIVE PAINT



Decorative coating for creating a sparkling finish on interior and exterior features. Gives objects a coloured shine and shimmer, creating an original decorative effect on metal, wood, plastic, plaster, glass, ceramic and other surfaces. Offers excellent adhesion to most materials. Apply by spraying directly or through a stencil. Recommended for coloured or previously painted surfaces.

KUDO DECO FLEX LIQUID RUBBER

KUDO DECO FLEX™ is a unique, easily removable rubber coating for protective and decorative painting of a wide range of materials (metal, plastic, glass, wood, stone, brick, etc.) without priming. Peels off easily without leaving any residue. Extends service life and provides reliable protection against chips, scratches, corrosion, scuffing and UV radiation. Quickly transforms the appearance and texture of the painted item. Once completely dry, it forms a flexible film that retains its protective and decorative properties in all temperatures and weather conditions. Has a velvety rubber texture.

KUDO GENERAL-PURPOSE SPRAY ADHESIVE

General-purpose, water-resistant contact adhesive for bonding paper, cardboard, fabric, felt, leather, wood, cork, rubber, foam rubber, plastic, polyurethane foam, mineral wool and non-woven materials to each other and to wood, metal and stone. For interior use.

The adhesive's optimum setting time allows the bond position to be adjusted for 10–15 minutes. Remains flexible after drying and does not crack.

APPLICATION:

Warning! After use, prevent the spray nozzle from clogging by turning the can upside down and spraying until no more product is released.

KUDO FOAMING CHANDELIER CLEANER

High-quality formulation for touch-free cleaning of chandeliers, wall lights, table and floor lamps, light fittings and crystal items. Gently removes household dirt and deposits without dismantling the item, rinsing or wiping its parts. The spray head with its integrated extension tube reaches even the most inaccessible areas. Minimises cleaning time. Also suitable for cleaning glass and shop windows.

APPLICATION:

Warning! Avoid contact with varnished surfaces and electroplated finishes.

KUDO LEAK SEALER SPRAY

High-quality formulation for sealing joints, seams and cracks in roofs and walls, around roof windows, gutters, chimneys, ventilation outlets, air-conditioning systems, etc. Forms a strong, permanently flexible waterproof film and protects against corrosion. Offers excellent adhesion to most building materials: galvanised and stainless steel, non-ferrous metals, plastic, concrete, stone, brick, wood, glass, etc. Wide service temperature range: –50 °C to +70 °C. Thixotropic; does not run or sag during application. Suitable for protecting vehicle underbodies and wheel arches. Provides sound insulation, resists weathering and does not crack or delaminate at sub-zero temperatures. Dries quickly; the dry coating can be overpainted with most types of enamel.

KUDO WATER-REPELLENT TREATMENT

FOR LEATHER AND TEXTILES

General-purpose water-repellent treatment for footwear and clothing made from various types of leather, textiles and technical materials with protective membranes. Penetrates the material, making it impermeable to moisture and forming a water-repellent surface coating that provides lasting protection against moisture and liquid dirt. Preserves breathability. Extends the life of footwear, clothing, sports and camping equipment. Recommended for regular use.

APPLICATION:

- Before use, test on an inconspicuous area to avoid damaging poorly dyed materials or delicate materials requiring special care.
- For smooth, patent and synthetic leather items, follow the care instructions for the item.
- For best results, apply to a clean, dry surface from a distance of 15–25 cm at an ambient temperature of at least +10 °C. Avoid over-application.
- Allow to dry. Treat new items 2–3 times initially, allowing 20–30 minutes to dry between applications.
- After treating suede or nubuck items, brush the coloured surface with a suede and nubuck brush.

KUDO AIR CONDITIONER CLEANER

PROFESSIONAL

Professional product for cleaning and disinfecting the evaporator of domestic air conditioners. The abundant foam quickly and effectively removes grease and other dirt, eliminating mould, bacteria and fungi that pose a risk of allergies and respiratory disease. Forms a protective disinfecting film on the evaporator, preventing the build-up and growth of harmful microorganisms that cause unpleasant odours. Leaves a fresh menthol and eucalyptus scent.

APPLICATION:

- switch off the power and remove the mesh filters;
- shake the can well;
- spray onto the evaporator coil;
- leave to act for 5–10 minutes;
- rinse thoroughly with clean water.

KUDO GAS+ ALL-PURPOSE GAS

FOR PORTABLE GAS APPLIANCES

All-season, all-purpose gas mixture of exceptional purity. For use in portable gas appliances (gas stoves, lamps, torches, camping equipment, etc.). The special gas blend provides:

- stable burning at temperatures down to –20 °C;
- high specific calorific value for economical gas consumption.

Contains special detergent additives that keep gas lines and nozzles clean and prevent premature failure of gas appliances.

One can provides 120–150 minutes of continuous burning in a camping stove at a medium flame setting.

APPLICATION:

- Connect the can in accordance with the gas appliance operating instructions.
- Use the can at temperatures from –20 °C to +40 °C.

Warning! Disposable can. Do not refill!

KU-H403

KUDO ALL-PURPOSE GAS

WITH ADAPTOR FOR REFILLING LIGHTERS

Highly purified, all-purpose gas for refilling gas lighters, gas torches and other gas-powered devices. The gas can valve uses innovative technology to prevent leakage during storage and when refilling lighters. Each can includes a set of adaptors for convenient refilling of lighters and gas appliances.

APPLICATION:

- Remove the cap from the can before refilling the lighter. Select a suitable adaptor.
- Turn the can upside down and insert the nozzle into the lighter's filling valve.
- Fill the lighter by pressing the can vertically downwards several times.

KU-H404

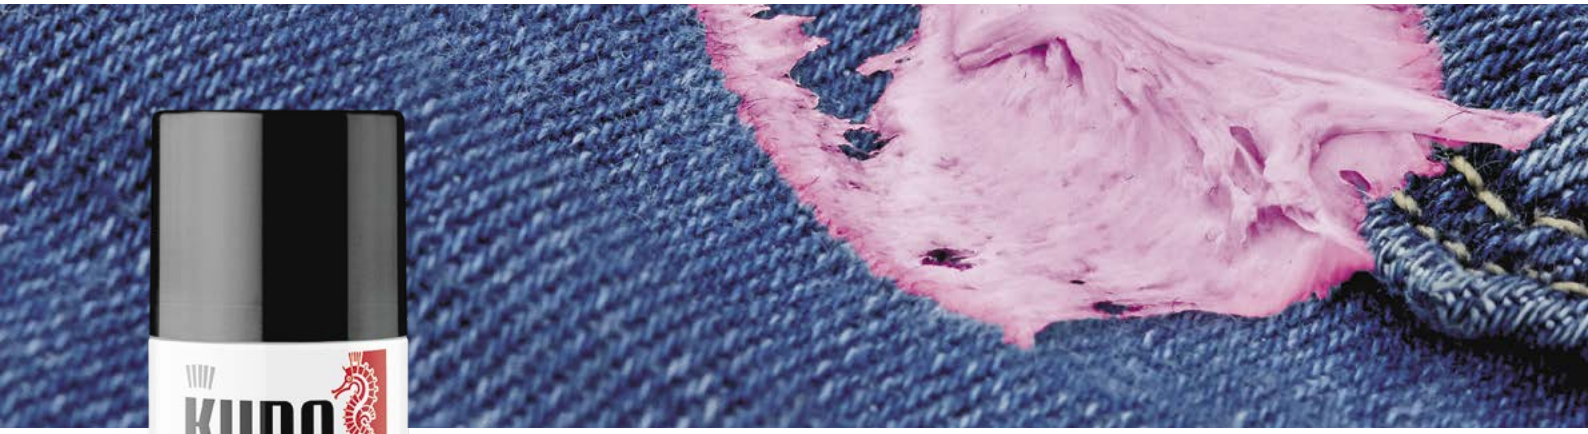
KUDO CHEWING GUM REMOVER



Effective product for removing chewing gum residue from fabric, plastic, tiles, smooth leather and wood. First, a chemical reaction removes the gum's elasticity and stickiness; it then cools the gum and makes it brittle (2-in-1). This dual action allows the gum to be removed easily from the surface. Do not use on suede or nubuck.

APPLICATION:

- Spray from a distance of 5–10 cm for 2–3 seconds. The can temperature must be at least +10 °C.
- Wait until a white deposit (frost) appears on the surface.
- Lift the edge of the residue with a sharp object and scrape it off.

KUDO RZh GUN OIL

NEUTRAL

For the care of all metal surfaces on all types of firearm and airgun (sporting, competition, hunting, small- and large-calibre, pneumatic, gas and rubber-bullet weapons). Effectively cleans carbon fouling from the bore, removes dirt and provides excellent lubrication for reliable mechanism operation. Recommended for short-term corrosion protection of metal surfaces and as a service lubricant for lightly loaded components operating at temperatures down to –50 °C. In the home, it can lubricate equipment and mechanisms such as sewing machines, winches, rollers, threaded joints, garage locks and door hinges, and prevent door locks from freezing.

APPLICATION:

- Shake the can vigorously for 1–2 minutes before use.
- Apply a thin layer to the surfaces to be treated and clean with a soft cloth.
- To remove powder fouling from the bore, use a cleaning rod with attachments appropriate to the contamination.
- Repeat the treatment if heavily soiled.
- For preservation, treat the weapon again and finish by wiping off excess lubricant with a cloth.
- Use the extension tube if required.

KU-H420

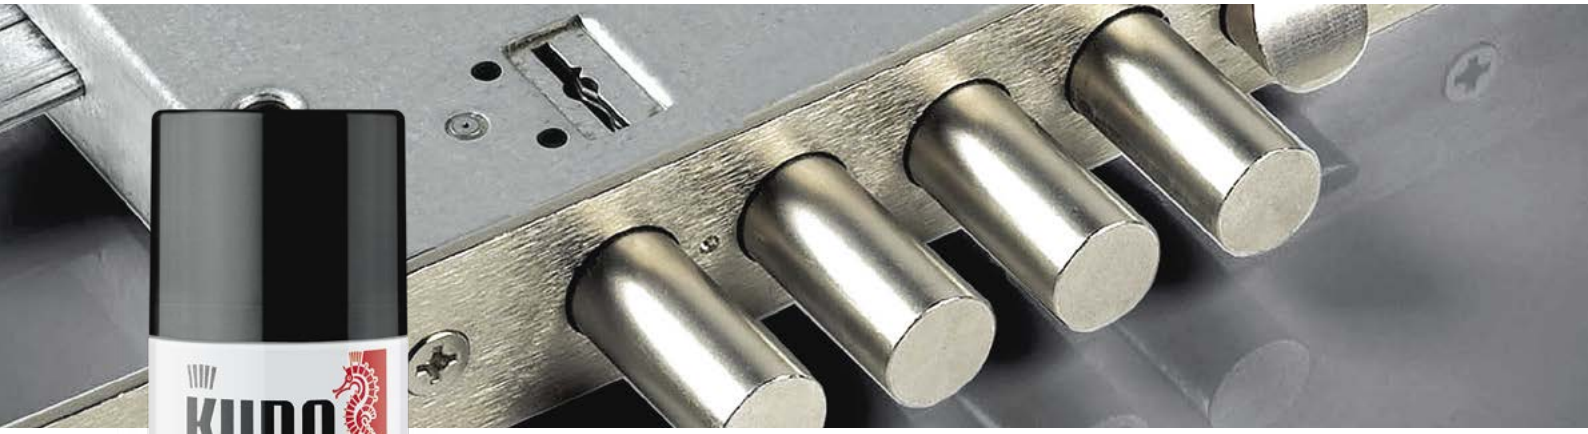
KUDO GENERAL-PURPOSE LUBRICANT

PENETRATING



For all types of assemblies, mechanisms, electrical appliances and weapons. The special oil in the formulation offers excellent penetration, quickly freeing and lubricating rusted threaded joints, squeaking hinges, springs and sticking locks. Prevents corrosion and oxidation. Displaces moisture from electrical contacts.

APPLICATION:

- Shake the can well before use.
- Spray onto the parts to be treated.
- Leave to act for 2–3 minutes.
- If the parts to be separated are heavily corroded, remove dirt and loose rust with a wire brush, then apply the product in several stages.

KU-H423

KUDO SILICONE LUBRICANT

GENERAL-PURPOSE

Silicone lubricant for the protective treatment of components and mechanisms. An aerosol formulation containing a blend of polydimethylsiloxanes, hydrocarbon solvents and hydrocarbon propellant. Protects, lubricates and cares for plastic, metal and rubber surfaces. Prevents rubber door and window seals from freezing, cracking and deforming, extending their service life. Eliminates squeaking door hinges and reduces the risk of cables, drives and locks jamming.

PROPERTIES:

- Forms a colourless, durable protective film.
- The polymer layer is chemically inert and has a wide operating temperature range.
- Provides long-lasting water repellency.
- Offers excellent penetration and moisture displacement.
- Provides corrosion protection for coatings.
- Contains no chlorinated hydrocarbons or mineral oils.
- Economical and versatile in use.
- The spray head with extension tube allows precise dosing and application.

KUDO LOCK DE-ICER

WITH SILICONE

Quickly and effectively de-ices the cylinders and mechanisms of mortice locks, rim locks and padlocks, as well as door hinges. Lubricates and protects against corrosion and subsequent icing. Regular treatment is recommended to prevent freezing.

APPLICATION:

- Insert the dispenser into the lock cylinder.
- Press the bottle 2–3 times.

In severe frost, increase the amount of product injected.

KUDO AIR DUSTER FOR EQUIPMENT

COMPRESSED AIR

For touch-free removal of dust and fine debris from hard-to-reach areas and the interiors of computers, audio, video and photographic equipment, office equipment and household appliances. Suitable for cleaning printed circuit boards, optical lenses, laboratory, diagnostic and other delicate equipment. The spray head with extension tube allows control of the direction and force of the jet. Leaves no residue when sprayed. Regular use extends equipment service life.

APPLICATION:

Warning! Clean devices only after disconnecting them from the power supply! The product significantly cools the parts being cleaned. Sudden cooling of hot components may impair their performance or even cause failure!

FILL SPRAY

KUDO 1K PRE-CHARGED CAN

KUDO FILL SPRAY 1K Pre-Charged Aerosol Can is for professional use only.

KUDO FILL SPRAY 1K Pre-Charged Aerosol Can is designed for filling with ready-mixed enamels in any colour. Filling must be carried out by trained personnel using professional equipment. The carefully balanced formulation allows filling with all types of solvent-based, single-component enamel, including metallic basecoats. The weight of enamel added must not exceed 100 g.

Filling must be carried out by trained personnel using a FILL SPRAY filling machine.

APPLICATION:

The number of coats, intercoat drying time and drying time depend on the material filled into the precharged can.

The filler is responsible for the quality of the finished product!
